INTERNATIONAL CONFERENCE

# FOOD CONTACT COMPLIANCE

*Dear friends and colleagues,*

the year 2025 marks a turning point for European legislation on food contact materials. The long-awaited **Regulation (EU) 2025/40** on Packaging and Packaging Waste (PPWR) has finally been published, setting the stage for a radical transformation of the packaging sector. This new framework introduces ambitious requirements on recyclability, recycled content, and extended producer responsibility.

In parallel, **Regulation (EU) 2025/351** has significantly revised the safety requirements for plastic food contact materials, with new restrictions and specific rules on substances of high concern. Of particular relevance is the **ban on Bisphenol A (BPA)** in food contact applications and the **ongoing scientific re-evaluation of the entire bisphenol group**, which is already pushing the industry toward alternative substances and formulations.

In this constantly evolving landscape, shaped by increased focus on sustainability and chemical safety, businesses must navigate new regulatory and technical challenges. The growing interconnection between legal frameworks, the push for supply chain transparency, and the adoption of digital compliance tools are making up-to-date expertise more essential than ever.

In its **12th edition**, the **International Conference on Food Contact Compliance** in Baveno will once again provide a unique opportunity to explore these issues with leading experts, institutional representatives, and industry professionals. Thanks to its high technical level, vibrant discussions, and the beautiful setting of Lake Maggiore, the conference has become a must-attend event for the sector.

*We look forward to welcoming you to Baveno!*

*The scientific  
manager  
Dario Dainelli*
